**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

The Publisher regrets that bar markers were unfortunately cut from micrographs in Figures 2 to 5, so the legends of these figures were not understandable by the readers. Please find new legend figures below.

FIG. 2. Cryo-FEG-SEM images of the sediment surface of the core incubated in the light and exposed to the air. Image width is approximately: (a) 0.24 mm; (b) 100  $\mu\text{m}$ ; (c) 80  $\mu\text{m}$ ; (d) 5  $\mu\text{m}$ ; (e) 10  $\mu\text{m}$ ; (f) 7.5  $\mu\text{m}$ ; (g) 25  $\mu\text{m}$ ; (h) 9  $\mu\text{m}$ . See text for explanations.

FIG. 3. Cryo-FEG-SEM images of the sediment surface of the core incubated in the light and immersed. Image width is approximately: (a) 0.24 mm; (b) 75  $\mu\text{m}$ ; (c) 7  $\mu\text{m}$ ; (d) 5.5  $\mu\text{m}$ ; (e) 8  $\mu\text{m}$ ; (f) 6.5  $\mu\text{m}$ ; (g) 25  $\mu\text{m}$ ; (h) 10  $\mu\text{m}$ . See text for explanations.

FIG. 4. Cryo-FEG-SEM images of the sediment surface of the core incubated in the dark and exposed to the air. Image width is approximately: (a) 0.27 mm; (b) 140  $\mu\text{m}$ ; (c) 0.24 mm; (d) 10  $\mu\text{m}$ ; (e) 25  $\mu\text{m}$ ; (f) 27  $\mu\text{m}$ ; (g) 6  $\mu\text{m}$ ; (h) 75  $\mu\text{m}$ . See text for explanations.

FIG. 5. Cryo-FEG-SEM images of the sediment surface of the core incubated in the dark and immersed. Image width is approximately: (a) 0.24 mm; (b) 9  $\mu\text{m}$ ; (c) 43  $\mu\text{m}$ ; (d) 20  $\mu\text{m}$ ; (e) 50  $\mu\text{m}$ ; (f) 75  $\mu\text{m}$ ; (g) 10  $\mu\text{m}$ ; (h) 5  $\mu\text{m}$ . See text for explanations.
