HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Key words. astrochemistry – ISM: abundances – ISM: molecules – ISM: clouds – photon-dominated region (PDR) – errata, addenda

An error occurred during the production process. The right panel of Fig. 1 was the same as the left one. The correct Fig. 1 is shown here.

Fig. 1. Spectral lines detected in absorption towards OMC-2 FIR 4. The green vertical lines mark $V_{\text{LSR}} = 9.3 \text{ km s}^{-1}$, i.e. the systemic velocity of the OH⁺ lines.
