HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Abstract Editors of *JGR-Solid Earth* express their appreciation to those who served as peer reviewers for the journal in 2021.

Plain Language Summary The editorial board of *JGR-Solid Earth* thanks those who served as peer reviewers for the journal in 2021.

This year again, we would like to offer our most sincere thanks to the thousands of reviewers worldwide who contributed their time and expertise to evaluate and improve the papers submitted to *Journal of Geophysical Research-Solid Earth*. Despite very challenging moments in the past 2 years, they have continued to volunteer their time—often at significant personal cost—, their knowledge, their advice, their critical questioning, and their constructive recommendations, to help and guide authors in strengthening the quality and impact of their papers. Beyond providing scientific guidance to authors, most reviewers have also helped them enhance their work by further encouraging the sharing of data and code as per AGU policy. The great majority of reviewers have also provided timely reviews, allowing us to proudly advertise a current median time of about 2 months for the first decision returned to the authors after review, and a current median time to acceptance between 5 and 6 months after one or more rounds of revision. In this process, many reviewers have spent significant additional time reviewing multiple versions of the same manuscript.

In 2021, *JGR-Solid Earth* benefited from 3,153 reviews provided by 1,917 colleagues distributed across the world. On behalf of the *JGR-Solid Earth* Editors and Associate Editors, the AGU, and the solid Earth science community at large, I warmly thank you all for your outstanding work and the considerable time spent reviewing *JGR-Solid Earth* manuscripts during 2021. You are among the best scientists in our community, and the gatekeepers of the high standards of our Journal. Thank you for your commitment in promoting and making high level, peer-reviewed science.

Isabelle Manighetti

Editor-in-Chief

On behalf of *JGR-Solid Earth* editorial board

Individuals in *italics* provided three or more reviews for *JGR-Solid Earth* in 2021.
